Suicide and Self-Damaging Behavior: A Sociobiological Perspective reviews the status of suicide and other exceptions to the prevailing regularities of behavior.

This book discusses the apparent anomaly of self-destructive behavior; current incidence of suicide and self-injury; self-destructiveness in other species; and biological fitness and social ecology of suicide. The pro-suicidal gene expression and natural selection; death concept; breakdown of other life-preserving factors with coping failure; and selection processes and altruism are also elaborated. This text likewise covers the chronic self-abuse, risk taking, and self-injurious or self-mutilative behavior.

This publication is a good source for anthropologists, psychologists, sociologists, and social scientists concerned with self-destructive behavior.
