Given the pace of how we harness and utilize electricity, as well as the importance of developing new sources of energy, electricity is a timely subject for kids to explore. In *Explore Electricity! With 25 Great Projects*, kids ages 6-9 will learn the basics of electricity: currents, circuits, power, magnetism and electromagnetism, motors and generators. They'll become more attuned to how much they rely on electricity in their daily lives. They'll also understand that while electricity is a wonderful resource, and one we've used to our advantage ever since it was discovered, the future of how we make and use electricity is still changing and there are things they can do today to impact these changes.

This title invites kids to experiment on their own with 25 simple projects that will “spark” their learning and enthusiasm, including making their own clothespin switch, lemon battery, compass, electromagnet, and flashlight, as well as generating their own “lightning.” These hands-on activities combined with informational text will excite kids about STEM? the interrelated fields of science, technology, engineering, and mathematics.

If you want to buy the e-book, you can available their official web-site along with order it. Have a nice read.

Ryan Dewitt:

As a college student exactly feel bored for you to reading. If their teacher asked them to go to the library or to make summary for some book, they are complained. Just small students that has reading's soul or real their hobby. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that looking at is not important, boring and can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this EXPLORE ELECTRICITY!: WITH 25 GREAT PROJECTS (Explore Your World)

can make you sense more interested to read.
