Low-Cost, Low-Tech Innovation: New Product Development in the Food Industry (Routledge Studies in Innovation, Organization and Technology) Vijay Vyas

Like much of SMEs research, innovation studies of small enterprises have commenced later and are less numerous. The focus of such studies remains high-technology enterprises, which continue to attract both academic and popular interest, oblivious to the innovative endeavours of people in traditional low-tech industries.

This book attempts to address this imbalance through a comprehensive analysis of innovation in this largely neglected area. Based on case studies of seven small innovative food companies, this book presents an in-depth analysis of innovation in the Scottish food and drinks industry and unravels a lesser-known approach to effective low-cost product innovation, which is simple and economical, yet elegant and successful.

Using careful data collection and rigorous statistical testing, the analysis and findings in this book address a wide spectrum of interests: academics in business schools, policy makers in governments and executives and entrepreneurs in food and other low-technology sectors.

From reader reviews:

Darren Billups:

Have you spare time to get a day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a wander, shopping, or went to the particular Mall. How about open or maybe read a book eligible Low-Cost, Low-Tech Innovation: New Product Development in the Food Industry (Routledge Studies in Innovation, Organization and Technology)? Maybe it is being best activity for you. You understand beside you can spend your time along with your favorite's book, you can better than before. Do you agree with its opinion or you have other opinion?

Walter Reeves:

Playing with family inside a park, coming to see the water world or hanging out with friends is thing that usually you could have done when you have spare time, after that why you don't try issue that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Low-Cost, Low-Tech Innovation: New Product Development in the Food Industry (Routledge Studies in Innovation, Organization and Technology), you may enjoy both. It is good combination right, you still desire to miss it? What kind of hang-out type is it? Oh come on its mind hangout guys. What? Still don't understand it, oh come on its called reading friends.

Pauline Jones:

Is it anyone who having spare time and then spend it whole day through watching television programs or just lying down on the bed? Do you need something new? This Low-Cost, Low-Tech Innovation: New Product Development in the Food Industry (Routledge Studies in Innovation, Organization and Technology) can be the response, oh how comes? The new book you know. You are thus out of date, spending your free time by reading in this completely new era is common not a nerd activity. So what these publications have than the others?

Shawn Martinez:

As a university student exactly feel bored for you to reading. If their teacher expected them to go to the library or make summary for some book, they are complained. Just minor students that has reading's soul or real their interest. They just do what the teacher want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that examining is not important, boring in addition to can't see colorful photos on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Low-Cost, Low-Tech Innovation: New Product Development in the Food Industry (Routledge Studies in Innovation, Organization and Technology) can make you really feel more interested to read.
