**The Effect of UV Light and Weather On Plastics and Elastomers (PDL Series Handbook) (PDL Handbook Series)** Plastics Design Library Staff

Ultraviolet rays, heat and moisture cause millions of dollars of damage every year to exposed materials. Understanding the weatherability of plastics and rubber is the only way to predict the durability of your end product. With that in mind, PDL compiled this book - the complete database on the effect of UV radiation and weather on the properties and appearance of plastics and rubber. Over 80 generic materials are in the database, covering many suppliers and grades. Thermoplastics, thermosets, thermoplastic elastomers, and rubbers, including alloys and other new material are covered. How various additives and fillers affect the weatherability of materials is also shown.
