Exercises and Solutions in Biostatistical Theory (Chapman & Hall/CRC Texts in Statistical Science)

Lawrence Kupper, Brian Neelon, Sean M. O'Brien

Drawn from nearly four decades of Lawrence L. Kupper's teaching experiences as a distinguished professor in the Department of Biostatistics at the University of North Carolina, **Exercises and Solutions in Biostatistical Theory** presents theoretical statistical concepts, numerous exercises, and detailed solutions that span topics from basic probability to statistical inference. The text links theoretical biostatistical principles to real-world situations, including some of the authors' own biostatistical work that has addressed complicated design and analysis issues in the health sciences.

This classroom-tested material is arranged sequentially starting with a chapter on basic probability theory, followed by chapters on univariate distribution theory and multivariate distribution theory. The last two chapters on statistical inference cover estimation theory and hypothesis testing theory. Each chapter begins with an in-depth introduction that summarizes the biostatistical principles needed to help solve the exercises. Exercises range in level of difficulty from fairly basic to more challenging (identified with asterisks).

By working through the exercises and detailed solutions in this book, students will develop a deep understanding of the principles of biostatistical theory. The text shows how the biostatistical theory is effectively used to address important biostatistical issues in a variety of real-world settings. Mastering the theoretical biostatistical principles described in the book will prepare students for successful study of higher-level statistical theory and will help them become better biostatisticians.

From reader reviews:

Valerie Bell:

The book Exercises and Solutions in Biostatistical Theory (Chapman & Hall/CRC Texts in Statistical Science) make you feel enjoy for your spare time. You can utilize to make your capable much more increase. Book can to get your best friend when you getting strain or having big problem with the subject. If you can make reading through a book Exercises and Solutions in Biostatistical Theory (Chapman & Hall/CRC Texts in Statistical Science) to get your habit, you can get considerably more advantages, like add your own personal capable, increase your knowledge about a few or all subjects. You could know everything if you like available and read a reserve Exercises and Solutions in Biostatistical Theory (Chapman & Hall/CRC Texts in Statistical Science). Kinds of book are several. It means that, science guide or encyclopedia or others. So , how do you think about this guide?

Dennis Mock:

Information is provisions for people to get better life, information presently can get by anyone at everywhere. The information can be a information or any news even a huge concern. What people must be consider if those information which is within the former life are difficult to be find than now could be taking seriously which one works to believe or which one the resource are convinced. If you get the unstable resource then you get it as your main information there will be huge disadvantage for you. All of those possibilities will not happen with you if you take Exercises and Solutions in Biostatistical Theory (Chapman & Hall/CRC Texts in Statistical Science) as your daily resource information.

Jesus Gates:

Are you kind of hectic person, only have 10 or perhaps 15 minute in your day time to upgrading your mind talent or thinking skill even analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your short space of time to read it because this time you only find book that need more time to be learn. Exercises and Solutions in Biostatistical Theory (Chapman & Hall/CRC Texts in Statistical Science) can be your answer because it can be read by you who have those short spare time problems.

David Murray:

What is your hobby? Have you heard which question when you got learners? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. And you know that little person including reading or as reading through become their hobby. You must know that reading is very important along with book as to be the factor. Book is important thing to include you knowledge, except your personal teacher or lecturer. You get good news or update about something by book. Numerous books that can you go onto be your object. One of them is this Exercises and Solutions in Biostatistical Theory (Chapman & Hall/CRC Texts in Statistical Science).
