Carl Schroter

Una excursión a las islas canarias (Escala en Tenerife) (Spanish Edition) Carl Schroter

La expedición a las Islas Canarias de un grupo de profesores y estudiantes suizos en 1908 no pretende descubrir nuevas especies o desarrollar teorías originales; su finalidad es enseñar a un selecto grupo de jóvenes estudiantes la metodología y el funcionamiento de los instrumentos científicos necesarios para iniciarse en el conocimiento de las ciencias de la naturaleza, no sólo en Europa sino en cualquier región del globo.

El doctor Schröter y sus colegas preparan concienzudamente el viaje; conocen los libros clásicos sobre Canarias y han consultado la bibliografía científica más reciente, como indican las numerosas citas y los amplios comentarios que aparecen a pie de página y en el capítulo «Notas y anexos». La mayor parte del libro se dedica a la botánica, aunque también aborda otros temas relacionados: el clima, la fauna o la geología. No faltan comentarios sobre las costumbres de los canarios, la agricultura o la ganadería, aspectos que casi siempre incluyen los libros de viaje de la época.

Carl Schröter fue un pionero en la conservación de la naturaleza, tal como se entiende actualmente, cooperó desde sus inicios con la Asociación Suiza para la Protección de la Naturaleza (1906) y fue presidente de la sección de Zúrich (1919-1924).
