High Voltage and Electrical Insulation Engineering (IEEE Press Series on Power Engineering)

Ravindra Arora, Wolfgang Mosch

The book is written for students as well as for teachers and researchers in the field of High Voltage and Insulation Engineering. It is based on the advance level courses conducted at TU Dresden, Germany and Indian Institute of Technology Kanpur, India. The book has a novel approach describing the fundamental concept of field dependent behavior of dielectrics subjected to high voltage. There is no other book in the field of high voltage engineering following this new approach in describing the behavior of dielectrics.

The contents begin with the description of fundamental terminology in the subject of high voltage engineering. It is followed by the classification of electric fields and the techniques of field estimation. Performance of gaseous, liquid and solid dielectrics under different field conditions is described in the subsequent chapters. Separate chapters on vacuum as insulation and the lightning phenomenon are included.

From reader reviews:

Richard Rhone:

Precisely why? Because this High Voltage and Electrical Insulation Engineering (IEEE Press Series on Power Engineering) is an unordinary book that the inside of the publication waiting for you to snap that but latter it will shock you with the secret this inside. Reading this book close to it was fantastic author who write the book in such incredible way makes the content within easier to understand, entertaining method but still convey the meaning thoroughly. If I had been you I will go to the publication store hurriedly.

John King:

Do you have something that you enjoy such as book? The guide lovers usually prefer to opt for book like comic, brief story and the biggest you are novel. Now, why not attempting High Voltage and Electrical Insulation Engineering (IEEE Press Series on Power Engineering) that give your entertainment preference will be satisfied by simply reading this book. Reading behavior all over the world can be said as the means for people to know world better then how they react toward the world. It can't be explained constantly that reading addiction only for the geeky individual but for all of you who wants to possibly be success person. So , for all of you who want to start examining as your good habit, you could pick High Voltage and Electrical Insulation Engineering (IEEE Press Series on Power Engineering) become your current starter.

Barbara Goodman:

This High Voltage and Electrical Insulation Engineering (IEEE Press Series on Power Engineering) is great reserve for you because the content and that is full of information for you who else always deal with world and still have to make decision every minute. This particular book reveal it data accurately using great plan word or we can point out no rambling sentences in it. So if you are read it hurriedly you can have whole data in it. Doesn't mean it only will give you straight forward sentences but difficult core information with splendid delivering sentences. Having High Voltage and Electrical Insulation Engineering (IEEE Press Series on Power Engineering) in your hand like getting the world in your arm, info in it is not ridiculous a single. We can say that no e-book that offer you world within ten or fifteen moment right but this publication already do that. So , it is good reading book. Hi Mr. and Mrs. hectic do you still doubt this?

Larry Witcher:

You may spend your free time to study this book this e-book. This High Voltage and Electrical Insulation Engineering (IEEE Press Series on Power Engineering) is simple to deliver you can read it in the area, in the beach, train and soon. If you did not get much space to bring typically the printed book, you can buy the e-book. It is make you much easier to read it. You can save often the book in your smart phone. So there are a

lot of benefits that you will get when one buys this book.
