Hyperbolic Geometry from a Local Viewpoint (London Mathematical Society Student Texts)

Linda Keen, Nikola Lakic

Hyperbolic Geometry from a Local Viewpoint (London Mathematical Society Student Texts)

Linda Keen, Nikola Lakic

Hyperbolic Geometry from a Local Viewpoint (London Mathematical Society Student Texts) Linda Keen, Nikola Lakic

Written for graduate students, this book presents topics in 2-dimensional hyperbolic geometry. The authors begin with rigid motions in the plane which are used as motivation for a full development of hyperbolic geometry in the unit disk. The approach is to define metrics from an infinitesimal point of view; first the density is defined and then the metric via integration. The study of hyperbolic geometry in arbitrary domains requires the concepts of surfaces and covering spaces as well as uniformization and Fuchsian groups. These ideas are developed in the context of what is used later. The authors then provide a detailed discussion of hyperbolic geometry for arbitrary plane domains. New material on hyperbolic and hyperbolic-like metrics is presented. These are generalizations of the Kobayashi and Caratheodory metrics for plane domains. The book concludes with applications to holomorphic dynamics including new results and accessible open problems.

From reader reviews:

Bruce Benedict:

What do you ponder on book? It is just for students because they are still students or the idea for all people in the world, the particular best subject for that? Only you can be answered for that problem above. Every person has various personality and hobby for each and every other. Don't to be forced someone or something that they don't wish do that. You must know how great and also important the book Hyperbolic Geometry from a Local Viewpoint (London Mathematical Society Student Texts). All type of book would you see on many solutions. You can look for the internet resources or other social media.

Jennifer Yost:

Reading can called head hangout, why? Because while you are reading a book particularly book entitled Hyperbolic Geometry from a Local Viewpoint (London Mathematical Society Student Texts) your head will drift away trough every dimension, wandering in each aspect that maybe mysterious for but surely will end up your mind friends. Imaging each word written in a reserve then become one contact form conclusion and explanation in which maybe you never get just before. The Hyperbolic Geometry from a Local Viewpoint (London Mathematical Society Student Texts) giving you another experience more than blown away your thoughts but also giving you useful details for your better life in this era. So now let us teach you the relaxing pattern here is your body and mind are going to be pleased when you are finished reading it, like winning a sport. Do you want to try this extraordinary wasting spare time activity?

Heather Killen:

Are you kind of busy person, only have 10 or 15 minute in your day to upgrading your mind ability or thinking skill also analytical thinking? Then you are experiencing problem with the book as compared to can satisfy your short period of time to read it because pretty much everything time you only find reserve that need more time to be examine. Hyperbolic Geometry from a Local Viewpoint (London Mathematical Society Student Texts) can be your answer since it can be read by an individual who have those short extra time problems.

John Yang:

Many people spending their time by playing outside with friends, fun activity using family or just watching TV all day every day. You can have new activity to enjoy your whole day by reading a book. Ugh, do you consider reading a book can definitely hard because you have to take the book everywhere? It alright you can have the e-book, bringing everywhere you want in your Touch screen phone. Like Hyperbolic Geometry from a Local Viewpoint (London Mathematical Society Student Texts) which is finding the e-book version. So , try out this book? Let's view.
