Since its inception in 1991, EUROMAT has been held each year on behalf of the Federation of European Materials Societies (FEMS), and alternates between general and topical prospectives.

This year's theme, Advances in Mechanical Behaviour, Plasticity and Damage, was proposed by the Societe Francaise de Metallurgie et de Materiaux (SF2M) to FEMS.

This publication contains a selection of papers presented at the EUROMAT 2000 Conference, held in Tours, France on 7-9 November 2000. The aim of this Conference was to concentrate mainly on recent advances made in the investigation of the relationship between microstructures of materials and their mechanical behaviour; including, fundamentals, modelling and applications. Encompassed in the Conference's aim is the nurturing of the synergistic effect between the theoretical and applied areas in this field. This was achieved by addressing important basic and practical aspects of the mechanical behaviour and damage of materials whilst also providing significant links between various complementary approaches.

All kinds of materials are covered and topics that were covered include the mechanics of solid polymers, microstructures and micromechanisms, and the collective behavior of defects which looks at the interaction of multiple defects in a system.

Yeah, it is to become complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we would like. Likewise

word says, many ways to reach Chinese's country. Therefore this Advances in Mechanical Behaviour, Plasticity and Damage can make you experience more interested to read.
