Practical Ethics in Clinical Neurology: A Case-Based Learning Approach Michael Williams

Practical Ethics in Clinical Neurology (PECN) is a case-based ethics textbook designed for readers who want a concise, accessible book to help them assess and resolve ethical challenges in everyday practice. With chapter topics and case content that reflect commonly encountered issues in adult and pediatric neurology, PECN meets the needs of students, residents, fellows, and practicing neurologists. With easy, web-based access to key guidance documents from the American Academy of Neurology, and references to important sections in Dr. James L. Bernat's *Ethical Issues in Neurology*, 3rd ed. (the most highly respected ethics textbook in neurology), PECN helps readers focus on the essential ethical and professional considerations in each case. Directors of medical student clerkships and residency programs in neurology will find that PECN helps them meet the learning objectives of the AAMC, ACGME, and ABPN.

Look inside and explore...

- Case-based approach places key ethical principles into a practical, real-world context to aid in decision-making.
- An outstanding array of learning features includes the following sections: Learning Objectives, Clinical Vignettes, Questions to guide self-study and group discussions, Key Points, Key Words, Suggestions for Further Reading, and more.
- Clinical pragmatism model helps readers analyze ethical issues in a clinical context.

This is the Kindle version which does not include access to the digital ancillary materials, nor videos referenced in the text.
