**What are the odds you could fend for yourself without the basic modern convenience of electric power?**

Proponents of survival skills often seek to do without electricity or other utilities knowing that in a crisis their service would be interrupted. And for many years that strategy seemed the smartest. But gradually technological advances have made it possible to provide our own sources of power, water purification and even connectivity to internet so you can maintain communications with others without relying on the ground based services that can be disrupted.

Going off grid is a means of liberating yourself from the shackles of the way services are delivered today. But more than that, it is the freedom of the limiting thought of our current way of life. It is the opportunity to ensure that you meet all your needs for survival and in doing so you ensure that you are fully in charge of your own life.

**This guidebook is the start of that quest for freedom. In it you will learn how to:**

- Build an off the grid home right where you are today,
- Survive in the wild without basic utilities,
- Take off grid living on the road with power and fuel, and
- Make sure your off grid lifestyle is sustainable so you never have to plug back into the Matrix again.

Disaster will come. Our infrastructure is woefully out of date. The time to prepare is now.
