Remote Sensing of Coastal Environments (Remote Sensing Applications Series)

Remote Sensing of Coastal Environments (Remote Sensing Applications Series)

As coastal environments around the world face unprecedented natural and anthropogenic threats, advancements in the technologies that support geospatial data acquisition, imaging, and computing have profoundly enhanced monitoring capabilities in coastal studies. Providing systematic treatment of the key developments, **Remote Sensing of Coastal Environments** brings together renowned scholars to supply a clear presentation of the state-of-the-art in this technically complex arena.

Edited by a recipient of the prestigious PECASE award, this book provides unrivaled coverage of the issues unique to coastal environments. It presents the best available data for measuring and monitoring coastal zones and explains how decision makers and resource managers can use this data to address contemporary issues in coastal zone management. The text illustrates the latest developments in active remote sensing, hyperspectral remote sensing, high spatial resolution remote sensing, the integration of remote sensing and *in situ* data, and covers the effects of land-cover and land-use change on coastal environments.

Complete with representative case studies, this authoritative resource provides a timely snapshot of the wide range of remote sensing applications in coastal issues to enhance the understanding of how increasing disturbances to our coastal regions are affecting the ecological dynamics, biological diversity, and ecosystem health of our coastal environments.

From reader reviews:

Steven Campbell:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to be aware of everything in the world. Each e-book has different aim or even goal; it means that book has different type. Some people sense enjoy to spend their time for you to read a book. They may be reading whatever they acquire because their hobby is definitely reading a book. Think about the person who don't like looking at a book? Sometime, individual feel need book once they found difficult problem or maybe exercise. Well, probably you will require this Remote Sensing of Coastal Environments (Remote Sensing Applications Series).

Holly Taylor:

Here thing why this specific Remote Sensing of Coastal Environments (Remote Sensing Applications Series) are different and trustworthy to be yours. First of all looking at a book is good but it really depends in the content of computer which is the content is as yummy as food or not. Remote Sensing of Coastal Environments (Remote Sensing Applications Series) giving you information deeper as different ways, you can find any publication out there but there is no reserve that similar with Remote Sensing of Coastal Environments (Remote Sensing Applications Series). It gives you thrill examining journey, its open up your own eyes about the thing this happened in the world which is perhaps can be happened around you. You can easily bring everywhere like in recreation area, café, or even in your technique home by train. If you are having difficulties in bringing the branded book maybe the form of Remote Sensing of Coastal Environments (Remote Sensing Applications Series) in e-book can be your option.

Chris Henderson:

Hey guys, do you really wants to finds a new book to study? May be the book with the name Remote Sensing of Coastal Environments (Remote Sensing Applications Series) suitable to you? Typically the book was written by famous writer in this era. The actual book untitled Remote Sensing of Coastal Environments (Remote Sensing Applications Series) is a single of several books that will everyone read now. This book was inspired many people in the world. When you read this e-book you will enter the new age that you ever know prior to. The author explained their plan in the simple way, therefore all of people can easily to comprehend the core of this book. This book will give you a great deal of information about this world now. In order to see the represented of the world in this book.

Beverly Woods:

Within this era which is the greater man or woman or who has ability in doing something more are more precious than other. Do you want to become considered one of it? It is just simple strategy to have that. What you are related is just spending your time almost no but quite enough to get a look at some books. Among the books in the top collection in your reading list will be Remote Sensing of Coastal Environments (Remote

Sensing Applications Series). This book which can be qualified as The Hungry Slopes can get you closer in growing to be precious person. By looking right up and review this guide you can get many advantages.
